PEREZ, GUILLERMO

ART UNIT

PAPER NUMBER

2834

DATE MAILED: 05/08/2002

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No.	Applicant(s)
	09/430,904	WEBB ET AL.
	Examiner	Art Unit
	Guillermo Perez	2834

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

1) Responsive to communication(s) filed on 15 April 2002.

2a) This action is **FINAL**.      2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

4) Claim(s) 4,5 and 7 is/are pending in the application.

4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.

5) Claim(s) \_\_\_\_\_ is/are allowed.

6) Claim(s) 4,5 and 7 is/are rejected.

7) Claim(s) \_\_\_\_\_ is/are objected to.

8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

9) The specification is objected to by the Examiner.

10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

11) The proposed drawing correction filed on \_\_\_\_\_ is: a) approved b) disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.

12) The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some \* c) None of:

1. Certified copies of the priority documents have been received.

2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.

3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).

a) The translation of the foreign language provisional application has been received.

15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

1) Notice of References Cited (PTO-892)

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_.

4) Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_.

5) Notice of Informal Patent Application (PTO-152)

6) Other: \_\_\_\_\_.

## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 15, 2002 has been entered.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1. Claims 4-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ostwald (U. S. Pat. No. 3,693,035) in view of Duffy et al. (U. S. Pat. No. 5,221,170) and further in view of H. C. Weidner, Jr. (U. S. Pat. Re. 27,085).

Ostwald discloses a dynamoelectric machine comprising a seal casing (18) and an end-shield (13), wherein the seal casing (18) and the end-shield (13) are secured by a plurality of electrically insulated bolts (14), each bolt having a head with a flange and a

threaded shank, with some portion of the threaded shank and the underside of the flange having an electrically insulating material (22, 23).

However, Ostwald does not disclose that the electrically insulating material is an epoxy powder composition coating applied thereto. Ostwald does not disclose that the coating remains functional with the plurality of bolts fully tightened and at an electrical potential in a range of 500-2500 VDC. Ostwald does not disclose that the coating has a thickness of about 0.004 to about 0.014 in. Ostwald does not disclose that the electrically insulating material extends to a location substantially midway along the threaded shank.

Duffy et al. disclose an electrically insulating epoxy powder composition coating (column 6, lines 67-68 and column 7, lines 1-9) applied thereto. Duffy et al. disclose that the coating remains functional with the plurality of bolts (figure 21) fully tightened and at an electrical potential in a range of 500-2500 VDC (column 4, lines 1-4). The invention of Duffy have the purpose of improving definition of the resin type material which is applied over a desired arcuate and vertical areas of the threads of the bolt.

H. C. Weidner, Jr. disclose that the electrically insulating material (22s) extends to a location substantially midway along the threaded shank (10b in figure 3). H. C. Weidner, Jr.'s invention has the purpose of sealing the aligned holes of the different stacked pieces.

It would have been obvious at the time the invention was made to modify the dynamoelectric machine of Ostwald and provide it with the electrically insulating epoxy powder composition coating and configuration disclosed by Duffy et al. and H. C.

Weidner, Jr. for the purpose of improving definition of the resin type material which is applied over a desired arcuate and vertical areas of the threads of the bolt.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the coating with a thickness of about 0.004 to about 0.014 in. since it has been held that where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation. *In re Aller*, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

### ***Response to Arguments***

Applicant's arguments with respect to claims 4-5 and 7 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Guillermo Perez whose telephone number is (703) 306-5443. The examiner can normally be reached on Monday through Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308 1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703)

Application/Control Number: 09/430,904
